## Calibration Management Software

### support program for

## MET/CAL™ and MET/TEAM™

## Technical data

When you are installing and learning a new software application, it's nice to know that help is nearby. Fluke is committed to helping you get the most from your investment in MET/CAL and MET/TEAM Calibration Management Software. The MET/SUPPORT Gold program has been designed to provide premier support services that help you maximize your software investment over time.

### **MET/SUPPORT Gold maximizes your investment over time**

MET/SUPPORT Gold is an annual membership program offering premium support and services to help you stay as productive as possible. Use only a few of the Gold services and you can easily recover more than the cost of your membership fee.

### **Priority access**

Call the MET/SUPPORT Gold hotline Monday through Friday between 8:00 a.m. and 4:30 p.m. Pacific Time (U.S., Canada, Mexico, Central and South America) or 8:00 a.m. and 3:00 p.m. Greenwich Mean Time (Europe) to talk to one of our highly qualified software experts. Or send your question by fax or email. Your questions will receive priority attention. Availability is limited in the Asia Pacific Region, and is dependent on local resources on a country-by-country basis. Contact your local Fluke office or representative for definition of available priority support services. All services are not equally available in all countries.

### **Software upgrades/updates**

Gold program members can upgrade to a new version of MET/CAL, released during their enrollment period. New software releases typically occur every 12 months, so there is a high

likelihood that this benefit alone could cover the cost of your MET/SUPPORT Gold membership. If you have multiple MET/CAL software licences, the savings add up quickly. And you have the peace of mind that comes from knowing you will always have the most current version of the software, plus priority support to help you get it up and running. Gold program members will be notified immediately when software updates are available. We'll make these updates available to you in the fastest, most convenient way possible (for example, via web download) during the time your membership is active.

Use just 6 to 8 procedures from the MET/CAL Procedure Library and you have recovered your Gold membership cost. My MET/SUPPORT Procedure Library has 12K+ procedures and procedures are frequently updated. Compared to the cost of hiring a procedure writer or buying individual procedures the Gold Plan is easily your most economical solution.

### **Free access to procedures library**

The procedures in the My MET/SUPPORT Procedure Library have been carefully written and tested in accordance with manufacturers' recommended calibration procedures. They provide the extra assurance of quality that our customers

have requested. MET/SUPPORT Gold members have free unlimited access to the procedure library, a valuable benefit that will save you time and significantly increase your productivity. Procedures are developed and added to the library continuously. You can view the current listing at <https://us.flukecal.com/support/my-met-support/procedures>.

**Training discount**

We'll include a 20 % discount on any calibration software training course you schedule within your active Gold membership. Our experienced trainers combine lectures with hands-on experience in a small classroom environment that provides personal attention and encourages group interaction.

**Discount on custom calibration procedure development**

If you don't see the procedures you need in our procedure library, we can develop them for you. Our highly trained software engineers will create the right procedures for your workload upon request, saving you time and effort. With your Gold membership, now you save money as well—MET/SUPPORT Gold members are eligible for procedure development discounts of up to 20 %.

**MET/SUPPORT Gold Membership Number**

Your Gold number should be retained as a useful reference for whenever you need priority support. You must provide your membership number in order to gain access to the premium support services.

**Match your Gold membership to your workload**

The MET/SUPPORT Gold membership is offered based on the number of workstations (user licenses), helping you match your membership benefits to the number of calibration workstations in your organization.

**Who is eligible for MET/SUPPORT Gold?**

The MET/SUPPORT Gold program is available worldwide. To purchase a MET/SUPPORT Gold membership, you must be using, purchasing, or upgrading to the latest version of a Fluke metrology software application (MET/CAL or MET/TEAM).

**Ordering information**

**Model**

MET/SUPPORT Gold

**Description**

Product Support Program, single workstation, one-year membership

**Model**
