Calibration

MFC Switchbox™ for molbox1™ and MFC-CB™

Technical Data

Supplies power and switches between up to five MFC or MFMs on one molbox1 or MFC-CB channel

The MFC switchbox is an accessory to the molbox1™ MFC option and MFC-CB mass flow control box. This accessory continuously powers up to five MFCs and/or MFMs (DUTs) and allows switching control between them on one molbox1 or MFC-CB channel.

The MFC switchbox contains internal switches to switch between five 25 pin MFC connection ports. molbox1 and MFC-CB support switchbox control allowing MFC switchbox channels to be changed by simple front panel menu selection or remote ASCII string commands.

The MFC switchbox has its own power supply which is configured to maintain continuous power to all five connection ports simultaneously. This allows an MFC to be tested on one channel while other MFCs are warming up. This feature is particularly useful for the many types of MFCs

that require an extensive uninterrupted warm up period to operate within stated specifications.

The MFC switchbox supports COMPASS® for molbox software's split control in which an MFC of one range can be used to automatically control the flow to measuring DUTs (such as MFMs) of other ranges. The controlling MFC is connected to channel 1 and the measuring DUTs are connected to the other four channels.

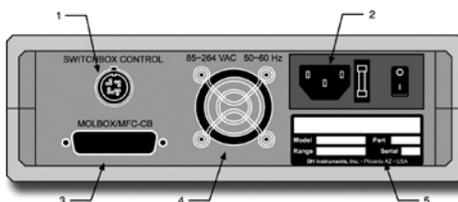

Note: MFC switchbox is intended for use with voltage based MFCs. Only one current based MFC at a time can be connected.

The MFC switchbox is connected to the molbox1 or MFC-CB MFC control connection and the switchbox communications port using cables supplied with the switchbox. The MFC connection cables (not included) are the same as those used when connecting directly to molbox1 or MFC-CB.

Specifications

Power requirements	85 V ac to 264 V ac, 50 Hz to 60 Hz, 55 V a max. consumption
Cooling	Active fan driven air circulation
MFC power supply	± 15 V, 260 mA per channel on up to five channels
MFC port connectors	Five 25 pin female DSUB metal case socket
MFC valve test point and current measurement	Available only on Channel 1
Weight	1.5 kg (3.25 lb)
Dimensions (W x H x D)	22.5 cm x 7.5 cm x 20.0 cm (8.85 in x 2.95 in x 7.87 in)

Ordering information

MFC Switchbox MFC Switchbox for molbox1 and MFC-CB

Includes: MFC switchbox control cable, molbox1 or MFC-CB to MFC switchbox cable, power cord, manual
