

September 4, 2019

END OF LIFE NOTICE

8508A Reference Multimeter

To whom it May Concern:

The 8508A Reference Multimeter is planned to be discontinued on March 31, 2020. These models have been in production since 2002 and have been a core measurement standard for calibration labs and precision measurement systems throughout the world. 8508A models may be subject to price increases after January 2020 and may be subject to production limitations at that time requiring discontinuance prior to the date stated above.

Replacement products:

The newly released, feature enriched and competitively priced 8588A is the enhanced replacement product for the 8508A. Some of the new features of the 8588A include:

- 2.7 $\mu\text{V}/\text{V}$, 95% confidence level performance on DC
- Capacitance measurement
- RF power measurements
- 5 mega-samples-per-second digitizing mode
- Graphic display and statistical math functions

Service Period:

It is our goal to continue to service 8508A product for a period of 5 years to March 2025. After that period Fluke will continue to support routine calibrations indefinitely.

Product Accessories: Accessories will remain available through Fluke service parts.

Sincerely,

Bruce A. Fuller
Product Manager
Fluke Calibration
