To Whom It May Concern

To better serve you, we want to make you aware of some important dates regarding the end of extended service support periods for discontinued products. Fluke Calibration typically offers extended service support for five years after discontinuing a product’s manufacture. After the extended support period has passed, we can no longer guarantee full service/repair parts to be available, and therefore possibly not be able to return instruments to usable condition. You may continue to send products for calibration. The models and extended support period end dates and capability are given below:
