

August 14, 2019

END OF LIFE NOTICE

5320A Electrical Safety Tester Calibrator

To whom it May Concern:

The 5320A Electrical Safety Tester Calibrator and 5320A-LOAD will be discontinued on August 31st, 2019 after serving customers for over thirteen years.

Replacement products:

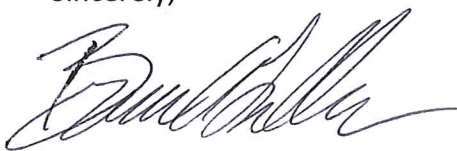

The newly released, feature enriched and competitively priced 5322A is the replacement product for the 5320A. New feature enhancements include:

- Direct 5kV measurement and display including THD and ripple
- Support for 4-wire ground bond testers
- Automatic check on V loop comp voltages
- 5kV external load resistor (5322A-LOAD)

Service Period: It is our goal to continue to service 5320A products for a period of 5 years beyond this date through July 2024. After that period Fluke will continue to support routine calibrations indefinitely.

Product Accessories: Accessories such as replacement leads will remain available through Fluke service parts.

Sincerely,

Bruce Fuller

Product Manager
