

MET/TEAM 2.3.0 HOT-FIX 2 README

This document includes a list of updates included in the MET/TEAM 2.3.0 Hot-Fix 2.

Note: This Hot-Fix only applies to MET/TEAM version 2.3.0. Do not attempt to apply this update to any other version of MET/TEAM!

Refer to the table below for a list of issues that are resolved by this Hot-Fix.

APPLYING HOT-FIX 2 TO MET/TEAM VERSION 2.3.0

To apply this Hot-Fix, it will be necessary to shut down MET/TEAM. Also, if you use MET/TEAM Mobile, it is recommended that all mobile workstations be checked in prior to performing the update. For these reasons, plan to do this at a time that is least impactful for your organization.

Before applying this Hot Fix, be sure you have already applied the previous Hot Fix. You can determine this by verifying the version on the About MET/TEAM dialog is Version 2.3.0.600.

1. On the MET/TEAM server, open Internet Information Services (IIS)
2. In the **Sites** node in the left pane, locate and select the **METTEAM** website node.
3. In the right pane under **Manage Website**, click **Stop**.
4. If you have installed MET/TEAM Customer Portal, repeat steps 2-3 for the **METTEAM Customer Portal** website.
5. Extract the files from the Hot-Fix 2 archive.
6. Using File Explorer, navigate to the folder for the MET/TEAM website (typically C:\inetpub\wwwroot\METTEAM).
7. Copy the **MET-Track.dll** file that was extracted from the Hot-Fix 2 archive to the **\bin** sub-folder, replacing the existing file.
8. If you have installed MET/TEAM Customer Portal, repeat step 7 for the **METTEAM Customer Portal** website (typically installed to C:\inetpub\wwwroot\CustomerPortal).
9. Using IIS, in the **Sites** node in the left pane, locate and select the **METTEAM** website node.
10. In the right pane under **Manage Website**, click **Start**.
11. If you have installed MET/TEAM Customer Portal, repeat steps 9-10 for the **METTEAM Customer Portal** website.
12. Open MET/TEAM, log in and select the **Help > About** menu item.
13. On the bottom left of the **About MET/TEAM** screen, verify the version number indicates **Version 2.3.0.603**.

MET/TEAM 2.3.0 HOT-FIX 2 CHANGES

Key	Issue Type	Description
MTM-1552	FIXED	Resolved an issue that would occasionally cause errors to occur when writing MET/CAL procedure results to MET/TEAM when Windows Authentication is enabled.
