

MET/CAL® Procedure Writing

A five-day course to familiarize you with traceability and procedure writing in the MET/CAL® calibration software environment

Course outline

- Basic operation of MET/CAL® software
- Adding standards
- Using non-referenced standards
- Running reports
- Customizing the run prompts
- Overview of the Function Selection Codes (FSC)
- Using FSCs in a procedure
- Examples of MATH and LIB FSCs
- Examples of IEEE, SCPI and PORT FSCs
- Establishing uncertainty in MET/CAL® software
- Complete a working procedure for a Fluke handheld DMM
- Test your procedure using a Fluke calibrator
- Full results table
- Examples of uncertainty in a procedure
- Using Crystal Reports

Who should attend

This course is designed for calibration professionals who use MET/CAL® calibration software and need training on how to write and edit MET/CAL® procedures.

Prerequisites

You should be experienced in the day-to-day operations of a calibration laboratory and have an understanding of electronic instrument calibration theory and practical application. A working knowledge of your

company's policy and practices in calibration is beneficial. It is advised to have some hands-on experience with MET/CAL® software. You should be comfortable with typing on a computer keyboard.

Course information

Course No.: TRC 1206

Course Length: Five days or 34 hours class time (This supports requirements for continuing education.) After completing the course, all attendees will

receive a Fluke Certificate of Completion.

Course Materials: Fluke will provide all materials needed to complete the course.

Registration

Complete and submit the on-line registration form at **www.flukecal.com/training**. Once you submit the form, a Fluke Calibration representative will contact you to verify space availability and to discuss payment terms. If you have an active MET/SUPPORT Gold plan or Gold CarePlan, you are eligible for a 20 % discount on course fees. Once you provide payment to finalize your registration, you will receive an email confirmation with course details.

We recommend that you register 60 days in advance of the desired course.

Cancellation

You may cancel your training at no charge upon notifying Fluke Calibration at least two calendar weeks before your confirmed class start date. If your cancellation is received less than two weeks in advance, you will be charged the full tuition for the course.

Fluke Calibration reserves the right to cancel any course that does not reach minimum enrollment two weeks prior to the class start date. Should this happen, you will be notified immediately.

Economical training for groups

If you want to train a large group, an on-site course can be an economical solution. Contact Fluke Calibration for a price quote and details.
