

MET/TEAM 2.2.1 AND MET/CAL 9.1.1 UPDATE

The MET/TEAM version 2.2.1 and MET/CAL version 9.1.1 release is a minor update to the previous MET/TEAM and MET/CAL system. This update includes only bug fixes and minor updates.

When updating an existing MET/TEAM system to this release, the existing MET/TEAM system must first be updated to version 2.2.0, which was a major update from previous versions and may take a significant amount of time to update.

If you are running a version prior to v2.2.0, first obtain an update for v2.2.0 and refer to the documentation included with that release for more details on updating MET/TEAM before updating to this version. When updating from a previous version to version 2.2.0, download and use the latest [Database Update Tool](#) instead of the Database Update Tool that was included with the version 2.2.0 distribution media.
